1. This action is responsive to application submitted on November 21, 2003.

Reasons for Allowance

2. Claims 1-51 are allowed over prior art of record.

The following is an examiner's statement of reasons for allowance:

The instant application relates to call setup and minimizing delays in setting up calls. The innovative steps include "assigning a primary channel, by the BS to MS, and an IS 2000 supplemental channel upon determining whether or not MS will require higher data rate channel at the time when MS is in a non-traffic state" (claims 1, 18, 31, 41, 48-51), thereby improving call set up delay time. In the closest prior art of record, Tiedemann, JR. et al. (US 2002/0154610) and Kay et al. (US 5,299,198), are in the same field of endeavor, however, both references disclose sending a control signal to determine the capacity and for allocation of both forward and reverse traffic channel while MS is in traffic state and, consequently, causing delays in setting of a call. The cited art, singularly or in combination, fails to disclose the above underlined method step and render the claims allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Art Unit: 2667
